

# AMERICAN SERIES - 33101L

Wobble Stator Progressive Cavity Pump

American 33101L

## Features

- Low Cost
- Low Shear
- Solids Handling
- Compact Design
- Direct Motor Speeds
- Gear Reduction Options

## Materials

**Rotor:** *Stainless Steel Chrome-Plated*

**Stator:** *Buna, Viton™, EPDM*

**Motor:** *1/2, 3/4, 1, 1.5, and 2 hp*

**Inlet:** *Radial - 3/4"*

**Outlet:** *3/4"*

**Bases:** *Steel or Stainless Steel*

## Pump Description

The American 33101L Progressive Cavity Wobble Stator Pump Series from Liberty Process Equipment offers the best value available on the pump market for a progressive cavity pump for flows up to 1.9 GPM and pressures up to 150 psi. The simple design of the wobble stator and just one universal joint give you the inherent advantages of a progressive cavity pump of low pulsation and shear, solids handling and viscous liquids at an affordable price.

The Long-Coupled and Close-Coupled Version is available in Cast Iron with standard Buna Nitrile Stator with options in Viton and EPDM and Stainless Internals with a hard-chrome plated rotor for long service life. In addition, the pump is available with a standard mechanical seal or can be upgraded to a hard-face mechanical seal for abrasion resistance.

The American Pump Series is offered in a Long-Coupled design for mounting on a baseplate with a standard motor. All pumps are offered "off the shelf" from our inventory for immediate shipment.
